

Beacon 16" Half-Round

WAL-081

Beacon 16" Half-Round

WAL-081

DESCRIPTION

Taking inspiration from prolific mid-century woodworking masters such as George Nakashima, the Beacon collection features premium American hardwood slats joined to precisely carved rings. The cylindrical form and vertical lines direct light away from the eyes, reducing glare and highlighting the beauty of the natural wood tones while housing a glass diffuser inside.

The Beacon 16" Half-Round is a wall sconce under 4" in depth. Its shallow footprint makes it adaptable to various spaces with a bright and well-diffused throw of light. The LED light source uses the latest cutting-edge technology for flicker-free dimming, beautiful color rendering, and a future-proof design for easy replacements of the module.

MATERIALS

Aluminum, Brass, Glass, Wood
