

Cathedral Sconce 12"

WAL-061

Cathedral Sconce 12"

WAL-061

DESCRIPTION

Cathedral is a contemporary representation of the classic outdoor lantern. Milled solid-brass rings hold a frosted glass cylinder and linear brass slots diffuse the powerful light source. When viewing up close, the lamp is concealed in a way to allow the glass cylinder to be completely un-obstructed - allowing air and light to pass throughout the entire inside of the sconce.
