

PLANK TABLE SERIES

BassamFellows introduced the Plank Series as a response to a design challenge: how to make an incredibly lightweight table that would appear to almost defy gravity? Like some of the best modern architecture, the Plank Table challenges typical notions of structure.

The table's innovative design formula uses a triangular structure that is independent of the rectangular geometry of the top, the Plank Table's legs are thus minimized and the structural span is maximized. The result is a three-legged table with triangular cantilevers at each end, creating the illusion of a floating surface. Larger tables link two triangular structures back-to-back to form a zigzag pattern with four legs, achieving spans of up to 9 feet – the lightest possible visual to contrast the mass of the beautifully crafted solid wood plank top. The base is made of cold rolled true bar brass, oxidized to patina gracefully with age. Joints are hand welded.

Due to its slim-line silhouette, the table is eminently versatile and scalable

	H 13 3/4" Top 3/4"	H 35cm Top 2cm
CB-333 Plank Side Table	W 23 5/8" D 17 3/4"	W 60cm D 45cm
CB-332-140 Plank Coffee Table Short	W 55 1/8" D 17 3/4"	W 140cm D 45cm
CB-332-180 Plank Coffee Table	W 70 7/8" D 17 3/4"	W 180cm D 45cm

Materials Solid Santos Rosewood, Teak,
Walnut or Ash. Oxidized brass base.
